

Civilian Applications of UAVs – A California Perspective

26–28 March 2013 • Hyatt Westlake Plaza in Thousand Oaks • Westlake Village, California

Unmanned Aerial Vehicle (UAV) spending is expected to almost double over the next decade, from annual worldwide expenditures of \$6.6 billion to \$11.4 billion, totaling more than **\$89 billion over the next ten years.**

Congress has directed the FAA to create six testing sites and a UAV certification plan by 2015. California is expected to earn a test site.

Learn how you can benefit from the growth of the UAV market.

Policymakers, designers, manufacturers, and consumers will discuss the opportunities for commercial and civil UAVs at this unique event.

Program Highlights:

- Opening Session Dinner with California Lieutenant Governor **Gavin Newsom**, Chair, California Commission on Economic Development, and **Kish Rajan**, Director, California Governor's Office of Business and Economic Development
- Panel Discussions
 - **State and local government opportunities** for economic development, job creation, and education in the UAV industry
 - **Public Safety** – Future of UAVs for law enforcement, fire, emergency management, border patrol, and first responders
 - **Current and future innovative use of UAVs** in commercial applications
- **Visit Naval Base Ventura County** for UAV presentations, exhibits, lunch, and demonstrations
